Remote Blood Pressure Monitoring Study in Adults With Hypertension

Protocol ID: BPLINK-HTN-01 **Study ID:** STUDY-005

ICF version: 1.0-POR

Site ID	SITE-005-C
Institution	Seacoast Hypertension Research
Principal investigator	Dr. Ruth Alvarez
Study coordinator	Ben Carter
Coordinator phone	+1-617-555-2053
Based on master ICF version	1.0

Why am I being asked to participate?

You are being invited because you may meet the eligibility requirements for a research study involving Hypertension.

What is the purpose of the study?

The study is evaluating BP-Link. The study is expected to last approximately 12 weeks for each participant.

What will happen if I participate?

You will complete study procedures listed in the approved schedule. Some activities occur at the study site and some may occur remotely. You may receive secure messages containing reminders, study questions, or links to approved study forms.

What information will I provide?

The study may collect: Systolic blood pressure, Diastolic blood pressure, Pulse, BP medication taken, Symptoms.

What are the possible risks?

This synthetic document is not a real risk disclosure. Example categories for demonstration include minor discomfort from cuff inflation, privacy risks related to remote monitoring, possible anxiety from repeated measurements. A real ICF would contain the exact IRB-approved risk language.

Are there benefits?

You may or may not receive direct benefit. The information may help researchers learn about the condition or intervention.

Do I have to participate?

No. Participation is voluntary. You may decline or withdraw according to the procedures described by the study team.

How will my information be protected?

Study records will use a participant identifier where possible. Contact information used for messaging is stored separately from research analysis data. A real study may use a separate HIPAA/privacy authorization.

Who can I contact?

Questions about this study can be directed to Ben Carter at +1-617-555-2053, or to the study investigator, Dr. Ruth Alvarez.

Electronic communication

If you agree to receive electronic study communications, the study may send approved reminders and study materials to your registered contact method. Urgent medical concerns should follow the study's emergency instructions rather than rely on automated messaging.

CONSENT SIGNATURES

By signing, I confirm that I had the opportunity to review the study information and ask questions. This signature block is synthetic and for product testing only.
