SYNTHETIC INFORMED CONSENT FORM - SITE VERSION

SYNTHETIC DEMO DOCUMENT - FOR SOFTWARE TESTING/HACKATHON USE ONLY - NOT IRB APPROVED

A Phase II Study of RA-315 in Adults With Active Rheumatoid Arthritis

Protocol ID: RA315-204 **Study ID:** STUDY-007

ICF version: 1.2-HAR

Site ID	SITE-007-B
Institution	Connecticut Valley Rheumatology
Principal investigator	Dr. Kenji Watanabe
Study coordinator	Rosa Diaz
Coordinator phone	+1-617-555-2072
Based on master ICF version	1.2

Why am I being asked to participate?

You are being invited because you may meet the eligibility requirements for a research study involving Rheumatoid Arthritis.

What is the purpose of the study?

The study is evaluating RA-315. The study is expected to last approximately 12 weeks for each participant.

What will happen if I participate?

You will complete study procedures listed in the approved schedule. Some activities occur at the study site and some may occur remotely. You may receive secure messages containing reminders, study questions, or links to approved study forms.

What information will I provide?

The study may collect: Joint pain severity, Morning stiffness duration, Weekly injection given, Injection site reaction, C-reactive protein.

What are the possible risks?

This synthetic document is not a real risk disclosure. Example categories for demonstration include injection site reactions, upper respiratory infections, headache, unknown risks typical of an investigational product. A real ICF would contain the exact IRB-approved risk language.

Are there benefits?

You may or may not receive direct benefit. The information may help researchers learn about the condition or intervention.

Do I have to participate?

No. Participation is voluntary. You may decline or withdraw according to the procedures described by the study team.

How will my information be protected?

Study records will use a participant identifier where possible. Contact information used for messaging is stored separately from research analysis data. A real study may use a separate HIPAA/privacy authorization.

Who can I contact?

Questions about this study can be directed to Rosa Diaz at +1-617-555-2072, or to the study investigator, Dr. Kenji Watanabe.

Electronic communication

If you agree to receive electronic study communications, the study may send approved reminders and study materials to your registered contact method. Urgent medical concerns should follow the study's emergency instructions rather than rely on

automated messaging.

CONSENT SIGNATURES

By signing, I confirm that I had the opportunity to review the study information and ask questions. This signature block is synthetic and for product testing only.
